Toronto, ON, Canada

TECHNICAL SKILLS

Working Knowledge: HTML, CSS, Python, Flask, JavaScript, React.js, Node.js, Express.js, Ionic Framework, REST APIs, MySQL, PostgreSQL, Prisma ORM, Git, Github, Github Actions, AWS, Lambda, EC2, API Gateway, Cloudwatch, OpenAI, Jira

Exposed To: Next.js, Redux, Django, TypeScript, Angular.js, Bootstrap, Styled Components, Jest, Python Unittest, AWS SNS, GraphQL, Tailwind, Docker

EXPERIENCE

Full Stack Software Engineer & Team Lead

March 2023 – Present

multplAI

Toronto, ON

Python, Flask, React, Next.js, Javascript, Typescript, AWS, Lambda, EC2, API Gateway, Github Actions, OpenAI, Jira, Unittest

Leading a fullstack team focused on building out the backend API, Chrome plugin, and ReactJS & NextJS frontend to deliver a modern and streamlined job search platform, leveraging AI, ML and web scraping.

- Facilitated daily stand-ups, sprint planning, ticket scoping, retros, and cross-team demos in an Agile environment using Jira and SCRUM, helping the team resolve blockers and improve delivery cadence.
- Architected and implemented a serverless backend platform utilizing Python and Flask on AWS Lambda and API Gateway, delivering improved scalability and reduced infrastructure costs.
- Built out CI/CD automation using Github Actions, using pytest, unittest to achieve 89% code coverage for all backend API endpoints, and automating development build deployments to AWS Lambda.
- Implemented NextJS 13's new App Router and Server Side Rendering on our frontend stack, resulting in a 57% reduction in initial page load times compared to the original architecture.
- Developed and implemented a scalable and efficient job scraping platform utilizing Scrapy and Scrapeops, resulting in a scraping success rate of over 99% across multiple job boards.
- Developed a Chrome plugin enabling seamless autofill of job application forms by integrating with OpenAI and GPT3.5-turbo on our backend, significantly reducing the time required to fill in applications.

Frontend Engineer - Freelance

Feb 2023 – Aug 2023

Tidey Mitchener Consulting

Toronto, ON

HTML, CSS, Angular, Ionic Framework, TypeScript, JavaScript, AWS S3

- Developed a mobile-first and responsive front-end using Ionic and Angular, enhancing user experience and ensuring seamless accessibility across devices.
- Optimized communication channels with the backend to dynamically display data, resulting in significantly improved performance and response times by 67%.
- Successfully integrated external platforms for payment processing and email automation, streamlining the user journey.

Digital Services Senior Executive (Product Manager)

Feb 2017 – Feb 2021

Banglalink

Dhaka, Bangladesh

- Led strategic planning and execution processes, defining key metrics to drive business growth through apps and value-added services, consistently maintaining daily revenue above USD 75k
- Coordinated cross-functional teams and collaborated with technical teams to drive product development and formulated comprehensive distribution strategies for online and offline channels.
- Optimized customer journeys for a diverse portfolio of 100+ services and a music platform that achieved number 1 ranking on Google Play within 5 days. Leveraged data analysis to boost annual portfolio revenue by 20%.
